PROFILE

UI/UX Designer and user researcher with a Master of Fine Arts in UI/UX Design (University of California, Davis) and a Bachelor of Fine Arts in Graphic Design (Southern Utah University), currently pursuing an M.A.Sc. in Digital Media at Carleton University. Brings 2+ years of professional product design experience across U.S., Canadian, and Chinese technology companies. At Caseproof LLC, created the Figma designs and technical design documentation for the website redesigns of four WordPress software brands — Pretty Links, ThirstyAffiliates, WishList Member, and MemberPress — and led the team's Design Library initiative. Contributed to the AI-driven RFP tool "Voop", helping cut the RFP process from 9 steps to 4 and reduce completion time by 30%. Skilled in user research, data analysis, and qualitative and quantitative usability testing, with a track record of turning user insights into measurable design improvements. Experienced team leader, university teaching assistant, and prototyping lab assistant with hands-on digital fabrication skills.

CORE QUALIFICATIONS

- Product & Web Design: End-to-end redesign of four production product websites in a WordPress software portfolio, from Figma design through technical design documentation for development handoff.
- Design Systems & Libraries: Led a Design Library project cataloguing shared assets, components, and styles; created a brand style guide and icon set; oversaw style guide and custom animation implementation.
- User Research: Researched user preferences, behaviors, and satisfaction; consolidated feedback samples into prioritized user needs and redesigned user processes around them.
- Usability Testing: Planned qualitative and quantitative usability tests for four website redesigns; directed a 50-participant study in which 42 testers reported improved interaction.
- Data-Informed Design: Use data analysis and research findings to identify user pain points and translate insights into concrete design decisions.
- AI Product Design: Contributed to the design of an AI-driven RFP tool that reduced the workflow from 9 steps to 4 and cut completion time by 30%.
- Wireframe-to-Prototype Workflow: Optimized key product pages from wireframes through interactive prototypes, validating new UI components and workflows with users.
- Leadership & Collaboration: Led a UI design team; collaborated closely with product managers, developers, and fellow designers in remote and on-site settings.
- Teaching & Mentorship: Two years as a university Teaching Assistant leading weekly discussion sections of ~30 students and supporting learners from diverse academic and cultural backgrounds.
- Prototyping & Digital Fabrication: Hands-on with laser cutters, vinyl cutters, laser printers, and 3D printers; prepares and verifies digital files for production.
- Visual Design & Immersive Content: Graphic design foundation (BFA) with award-recognized work in illustration and XR content.

EXPERIENCE

NOV 2024 – MAY 2026

UI/UX DESIGNER

Caseproof LLC | Ann Arbor, Michigan, USA

- Created Figma designs and technical design documentation for the website redesigns of four WordPress software brands: Pretty Links, ThirstyAffiliates, WishList Member, and MemberPress.
- Prepared clear design documentation so developers could implement the redesigned pages accurately and consistently across all four brands.

- Led the Design Library project, organizing and cataloguing the team's shared assets, components, and styles so designers could quickly find and reuse them across products.
- Developed qualitative and quantitative usability testing plans for all four website redesigns.
- Applied data analysis and user research to identify user pain points and translate insights into design decisions.
- The launched websites improved visual appeal and strengthened brand recognition across Caseproof's software portfolio.

JUL 2023 – OCT 2023

UI/UX DESIGNER

GBCS IT Group | Toronto, Canada (Remote)

- Contributed to the design of "Voop", an AI-driven Request for Proposal (RFP) tool, collaborating with product managers to streamline the RFP process from 9 steps to 4.
- Directed usability testing that informed design changes reducing RFP completion time by 30%.
- Oversaw custom animation and style guide implementation to improve user efficiency and keep the interface visually consistent.

JUN 2023 – AUG 2023

UI/UX TEAM LEADER

Feastech Data Corp. | Sacramento, California, USA

- Led the UI team in creating a brand style guide and icon set for small IT businesses.
- Optimized key product pages from wireframe to prototype, iterating on layout and interaction.
- Directed user testing with 50 participants; 42 out of 50 testers (84%) reported improved interaction, validating the new UI components and workflows.

SEP 2022 – JUN 2024

TEACHING ASSISTANT

University of California, Davis | Davis, California, USA

- Assisted with lecture preparation; developed and led weekly 50-minute discussion sections of approximately 30 students each semester.
- Graded research papers, quizzes, midterms, final exams, and assignments; maintained accurate student records in Canvas and handled student information responsibly.
- Held weekly office hours, providing patient, individualized support to students from different academic and cultural backgrounds.

SEP 2022 – JUN 2024

PROTOTYPING LAB ASSISTANT

Makerspace, University of California, Davis | Davis, California, USA

- Assisted students and faculty with shared equipment, software, materials, and workspaces, including laser cutters, vinyl cutters, laser printers, and 3D printers.
- Prepared digital files for production and checked that student and faculty projects were correctly formatted before printing or fabrication.
- Provided clear instructions, answered questions, and helped users troubleshoot equipment and file-formatting issues.

MAY 2021 – SEP 2021

USER RESEARCHER

Xuanren Technology Company | Shanghai, China

- Researched robotic vacuum users' preferences and behaviors, focusing on their usage experience and feedback on product features.
- Collected data on user satisfaction and improvement suggestions.
- Systematically analyzed user feedback samples and consolidated user needs to optimize the robotic vacuum's usage logic.

- Redesigned the user process to improve overall user experience and product usability.

EDUCATION

- M.A.Sc. in Digital Media (In Progress, Fall 2026) | Carleton University, Ottawa, Canada
- MFA in UI/UX Design (2022 – 2024) | University of California, Davis | GPA: 3.81/4.0
- BFA in Graphic Design (2017 – 2022) | Southern Utah University | GPA: 3.61/4.0 | Dean's List 2020 – 2022

DESIGN & TECHNICAL SKILLS

- UI/UX Design: Figma, wireframing, user flows, low- to high-fidelity interactive prototyping, technical design documentation and developer handoff
- Design Systems: Design libraries and shared component/asset systems, brand style guides, icon design, custom UI animation
- Research & Testing: User research, user feedback collection and analysis, satisfaction data, data analysis, qualitative and quantitative usability testing plans
- Visual Design: Graphic design, brand identity, iconography, illustration, XR content
- Prototyping & Fabrication: Laser cutters, vinyl cutters, laser printers, 3D printers, production file preparation
- Platforms: WordPress product websites, Canvas LMS

SCHOLARSHIPS & FELLOWSHIPS

- Design Department Research Fellowship | University of California, Davis (2023 – 2024)
- Teaching Assistant Scholarships | University of California, Davis (2022 – 2024)
- International Deans' Scholarships | Southern Utah University (2020 – 2021)
- Centurium Scholarships | Southern Utah University (2019 – 2022)
- International Founders' Scholarships | Southern Utah University (2018 – 2022)

AWARDS

- ENGAGING CONTENT AWARD | XR Southern Summit (2025)
- AWARD RECIPIENT | United Nations Youth Drawing Competition (2021)
